Profile

AI Engineer & Generative AI Instructor

AI Engineer with proven experience building LLM applications, agentic AI systems, RAG pipelines, and generative AI automation workflows using Python, LangChain, LangGraph, and Azure OpenAI. Skilled in multi-agent orchestration, NLP model integration, prompt engineering, and deploying intelligent systems that serve real users. Strong background in designing AI architectures, integrating APIs, and bridging the gap between AI research and production engineering.

Technical Skills

Languages	Python, SQL
AI & LLM	LLMs, Generative AI, Agentic AI Systems, RAG, Multi-Agent Orchestration, Prompt Engineering, Embeddings, NLP, Supervised & Unsupervised Learning, LLM Fine-tuning (Unsloth)
Frameworks & Libs	LangChain, LangGraph, LangSmith, CrewAI, HuggingFace Transformers, FastAPI, Pydantic, Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, FAISS, Pinecone, N8N
APIs & Tools	OpenAI API, Azure OpenAI API, Anthropic Claude API, Whisper STT/TTS, Azure AI Search, Azure AI Document Intelligence
Cloud & Infrastructure	Azure OpenAI, Azure AI Foundry, Azure VMs (A100 GPU), AWS (basic), Docker (basic)

Work Experience

Generative AI Instructor | [Ayed Academy](#) | Remote

Jun 2026 – Present

- Designed and delivered two Generative AI programs covering AI Tools Mastery and customized AI solutions for teachers, translating complex concepts into practical workflows for non-technical audiences.
- Trained learners in Prompt Engineering, LLMs, AI-assisted research, multimodal content generation, and AI-powered productivity through practical, hands-on sessions.
- Developed project-based learning experiences enabling learners to create real-world social media campaigns, presentations, videos, educational content, and websites, receiving strong positive feedback.

AI Engineer | [Neqabty](#) | Hybrid

May 2025 – Present

- Developed 7+ chatbot and AI automation systems for government and syndicate clients, owning sprint planning, requirements gathering, deployment coordination, and cross-team collaboration with backend and mobile squads.
- Architected a RAG system on Azure (GPT-4o, AI Document Intelligence, AI Search) with custom embedding pipelines and semantic vector search over Arabic PDFs, deployed across 5 syndicates handling 1,000+ monthly queries with context-aware, citation-backed responses.
- Built and deployed a real-time voice AI system achieving sub-300ms end-to-end latency using Azure OpenAI Realtime API, Whisper STT/TTS on A100 GPU, and WebSocket streaming for live speech-to-speech support.
- Engineered multi-step agentic AI workflows using LangGraph with tool-use, function calling, and state management — enabling automated document processing and multi-stage reasoning pipelines for enterprise clients.
- Engineered eKYC verification system using Azure Face API and Document Intelligence for national ID authentication with liveness detection, enabling remote syndicate registration and preventing identity fraud.
- Developed legal awareness chatbot and women's rights support platform using RAG for context-aware legal guidance in partnership with government ministry and advocacy organizations.
- Presented POC agentic AI architecture (LangChain, LangGraph, Azure OpenAI) at NVIDIA × Microsoft Accelerator Demo Day to senior engineers and investors.

AI Data Annotator | [AfterQuery Experts](#) | Freelance

April 2025 – May 2025

- Built and Fine-tuned an LLM data pipeline on 50+ US corporate 10-K annual reports to automate financial query generation, reducing manual analysis time by ~60% and outperforming a rule-based baseline in output accuracy

Generative AI Intern | [Sprints](#) | Remote

February 2025 – March 2025

- Engineered a 4-agent CrewAI system using multi-agent orchestration to automate research, summarization, and reporting workflows, achieving 30% faster task completion vs. single-agent baseline.
- Delivered technical presentation on multi-agent LLM architecture and pipeline design to 40+ engineers and mentors, translating complex AI systems into clear, actionable engineering insights.

Education

Bachelor of Computer Science & Engineering

September 2018 - July 2023

Faculty of Electronic Engineering, Menoufia University, Egypt

- **Graduation Project:** Plant Disease Detection Web App (Grade: **Excellent**)
- **Relevant Coursework:** Machine Learning, Database, Cloud Computing, Computer Vision

Achievements

- Secured **Top 3** placement out of 29 teams at EYouth Data Analysis Hackathon (May 2025) for customer churn and loan default prediction solution
- Selected as **Top 10** finalist among 100+ participants in Sprints Generative AI Program (March 2025) for building production-ready multi-agent CrewAI system

Certifications

- **EYouth Data Analysis Bootcamp** | EYouth | 2025
- **Building Multi-Agent Systems** | CrewAI | 2025
- **AI Career Essentials** | ALX | 2025
- **Machine Learning Cross-Skilling** | Udacity | 2023

Languages

- **Arabic:** Native | **English:** B2 (Advanced) | **German:** A2
